
NOTE—This map has been prepared from the best available data. The accuracy of location may, however, be doubtful, as there have been and may still be changes made by the Lincoln Highway Association.
The Lincoln Highway is not a part of the 50,000-mile system advocated by and shown on the maps of the National Highways Association. Much of the mileage of the Lincoln Highway, however, conforms to the alignment of said system.
The Lincoln Highway Association is not a part of nor has it any direct or indirect connection or affiliation with the National Highways Association, although the latter supports and approves of the former.
